INDUSTRIAL WASTE DISPOSAL PERMIT
COUNTY OF LOS ANGELES
DEPARTMENT OF COUNTY ENGINEER
INDUSTRIAL WASTE DIVISION

NO. 2561

FILE NO. I-2733-20

Los Angeles, Calif. May 22, 1961

Permission is hereby granted, under Ordinance No. 6130 (As Amended)

to Magnus Metal Division of National Lead Company

(Name of Industry)

6135 District Boulevard, Los Angeles 22, California

(Mailing Address)

to discharge or deposit industrial waste material from or upon the
premises located at

6135 District Boulevard, Los Angeles 22, California

Waste materials covered by this permit shall consist of:

industrial wastes resulting from foundry

and machine shop operations

and shall comply with all provisions of applicable ordinances and
regulations of the County of Los Angeles and the Los Angeles County
Sanitation Districts.

The above waste materials shall also comply with the special condi-
tions and limitations marked (x) on the reverse side hereof and any
special conditions and limitations attached hereto. All solid and
liquid industrial wastes not specifically described above shall be
disposed of at a legal point of disposal.

This permit is not transferable from one location to another and may
be revoked if used contrary to the provisions of the Sanitary Sewer
And Industrial Waste Ordinance.

JOHN A. LAMBIE
COUNTY ENGINEER

By Nathan Bergman

SPECIAL CONDITIONS AND LIMITATIONS

Industrial liquid wastes shall be pretreated by use of the following facilities prior to discharge into the sanitary sewer:

- (X) A standard pretreatment facility designated by the County Engineer as modified neutralizing.
~~standard~~ Standard No. 8-a-114
- () A grease interceptor of a type approved by the County Engineer with a flow capacity of _____ gallons per minute and grease retention capacity of _____ pounds.
- () A garbage grinder approved by the County Engineer and equipped with a valve operating to automatically shut off the water supply when the grinder is not in use.
- () Special facilities constructed in accordance with plans approved by the County Engineer, which plans are hereby made a part of this permit.
- () Special facilities:
- () Further special conditions and limitations are attached to this permit:

The Sanitary Sewer Ordinance contains certain restrictions on the use of sanitary sewers for disposal of industrial liquid wastes. In general the intent of the Ordinance is that all contaminated wastes may be discharged into the sanitary sewer provided they do not contain substances which will damage sewerage structures, increase maintenance costs, interfere with operation of the sewage treatment plant or create hazards to maintenance personnel. Examples of prohibited substances are acids, inflammables, oil and grease, heavy solids and substances capable of releasing toxic or excessively odorous gases. Storm water or uncontaminated cooling water cannot be discharged to the sanitary sewer. All required pretreatment facilities must be regularly cleaned and otherwise maintained in good operating condition.

Compliance with the special conditions listed in this permit in no way relieves the permittee from the obligation of meeting requirements of the Sanitary Sewer Ordinance or liability for payment of costs of cleaning or repairing sewers occasioned by the violation of such ordinance.

Any additional information desired regarding this permit or Sanitary Sewer And Industrial Waste Ordinance may be obtained by calling the Industrial Waste Division of the County Engineer's Office, Room 226, 108 West Second Street, Los Angeles 12, California, MA 9-4747, Extension 81385.
